

Dahlia Lobera | Front-End Web Developer

<https://dahlialobera-portfolio.netlify.app> | 512-200-5238 | delobera@gmail.com
[in/dahlia-lobera/](https://github.com/dlobera) | <https://github.com/dlobera>

I am a software engineer with a passion for seeing projects come to life. I aim to grow daily in my knowledge and skills as a developer to effectively contribute to a team. I believe that teamwork and relational resourcefulness is one of if not the most important aspects for continued growth in software development.

TECHNICAL SKILLS

Languages Learned: **HTML** | **CSS** | **JavaScript** | **Ruby** | **SQL**

Libraries/Frameworks Learned: **Bootstrap** | **Sass** | **jQuery** | **React.js** | **Redux** | **Node.js** | **Express.js** | **Mongoose**

Tools/Technologies learned: **Git/GitHub** | **RESTful APIs** | **MongoDB** | **PostgreSQL** | **Heroku** | **AWS**

PROJECTS

Kitchen Collective | Solo

1 week | <https://kitchen-collective.herokuapp.com/> | <https://github.com/dlobera/kitchen-collective.git>

- *Kitchen collective is a Men stack web app that usus google auth to allow users to create recipes and share them with friends and family, with as much ease as possible.*
- *I used Trello to plan my project and created a wireframe and ERD on Whimsical to map out my models and web flow of my page.*
- *Kitchen collective was created using HTML, CSS JavaScript, MongoDB, Mongoose, Express.js, and Node.js. App deployed on Heroku.*

CHEERS | Team Concept Project

Design Lead | 1 week | <https://cheers-ga.netlify.app/> | <https://github.com/Recipra/cheers-front-end.git> | <https://github.com/Recipra/cheers-back-end.git>

- *CHEERS is a MERN Stack app that uses jwt auth to have users sign in. Once logged in users can pair their favorite songs with their favorite drinks which we called 'boozy tunes'. Users are able to create, edit and delete their boozy tunes. Edit their profiles, and view other users profiles and boozy tunes.*
- *My team used Trello to plan our project and created a wireframe and ERD on Whimsical to map out the models and web flow of the page.*
- *CHEERS was created using HTML, CSS JavaScript, MongoDB, Express.js, Node.js, and The Audio DB API. App deployed on netlify.*

Dahlia In the City | Solo

1 week | <https://dahliainthecity.herokuapp.com/> | <https://github.com/dlobera/dahliainthecity.git>

- *In the City is a full-stack Django app that allows users to add different cities/ places they want to visit. They can create to-do lists of recommendations and places they would like to visit and can mark the date once they have visited.*
 - *I used Trello to plan my project and created a wireframe and ERD on Whimsical to map out my models and web flow of my page.*
 - *In the City was created using Python, CSS, Django, PostgreSQL, Docker, and GitHub. App deployed on Heroku.*
-
